Scenario: Everything Changed Overnight

Trent, 21, is a freshman studying business. Halfway through the semester, one of his professors suddenly switches to a new grading system. Assignments are different, deadlines shift, and expectations are unclear. Some students complain. Others disengage.

Trent feels frustrated too, but instead of resisting, he meets with the professor, adjusts his schedule, and creates a new strategy. At the end of the term, he's one of the few students who not only adapted but improved his grade.

Later, the professor says, "Your flexibility and initiative stood out. That's the kind of mindset employers look for."
